MoEPD	Ministry of Energy and Power Development	ZRP	Zimbabwe Republic Police
MoFED	Ministry of Finance and Investment Promotion		
MOMC	Major Oil Marketing Companies		

SECTION A: Profile of the Agency (MDA)

i. Introduction

The Zimbabwe Energy Regulatory Authority (ZERA) is a corporate entity created under the Energy Regulatory Authority Act [Chapter 13:23] of 2011. Its primary functions are to regulate, license, and promote the adequate supply of energy. ZERA's objective is to promote the efficient provision of energy that will drive growth and sustainability, guided by the National Development Strategy (NDS 1), launched on November 16, 2020, by His Excellency, President Emmerson Dambudzo Mnangagwa.

ii. Background

In accordance with the Public Entities and Corporate Governance Act of 2018, ZERA conducted its 2024 Strategic Plan implementation review and the 2025 strategy formulation workshop in September 2024. This followed performance reviews done at Sub-Programme and Programme levels in preparation for the workshop.

The purpose of the workshop was to assess overall strategy implementation progress for the Authority for the period 1st January 2024 to 31 August 2024, to ascertain how successfully 2024 strategic objectives had been implemented, identify challenges encountered, formulate strategies to address these and any other anticipated challenges and use this information in the formulation of the 2025 Strategic Plan.

The 2024 strategy implementation review was of specific importance, being the year preceding the final year of the 5 year (2021-2025) strategic plan. This review therefore needed to make an overall assessment of achievements on strategic objectives that had been set for the previous 4 years (2021 to 2024) and determine which objectives remained to be implemented in 2025. In its 2024 and overall, 4 year performance findings

lay the outstanding objectives required to be met by ZERA in 2025 so as to achieve its NDS(1) targets. The workshop hence reviewed the 2024 as well as the 4-year performance and developed relevant strategies therefrom as well as from 2024 ZERA Stakeholder Engagement Workshop feedback.

The Strategy Workshop was officially opened by the Deputy Minister of Energy and Power Development Honorable V. Simbanegavi. Officials from the Ministry of Energy and Power Development were in attendance and gave overall policy guidance to the Authority's strategic process.

It was also attended by representatives of the Tripartite, namely the Office of the President and Cabinet, Ministry of Finance, Economic Development and Investment Promotion and the Public Service Commission, who supervised and provided guidance for the successful holding of the workshop and ensured compliance to IRBM and PBB principles.

The Authority remains committed to fulfilling its mandate, in line with its vision of being the regulator that promotes universal access to sustainable energy by 2030. This vision aligns with the nation's objective of becoming a prosperous and empowered upper middle-income society by 2030. The workshop confirmed ZERA's significant step towards achieving this objective.

EXPECTATIONS FROM THE MINISTRY OF ENERGY AND POWER DEVELOPMENT FOR 2025 STRATEGIC YEAR

1. Capacity Expansion

- MOEPD expects ZERA to give top priority to the need to address the generation mix to include wind and more of solar and other alternative energy forms and to ensure radical implementation of power generation projects with a view to displace imports, become self-sufficient and eventually become a net exporter of power.

2. Infrastructure Development

- MOEPD is aware that there are communities in both rural and urban dwellings where electricity infrastructure is not available and expects ZERA to work with licensees to find a long-lasting solution for the provision of infrastructure.

3. Vandalism

- Theft and vandalism of energy infrastructure, particularly transformers, continues to negatively impact service delivery and reliability. The Government has reacted by imposing stiffer penalties to curb this scourge. It was urged to implement whistle-blower schemes as a further means of curtailing theft and vandalism.

4. System Losses

- Distribution losses need to be contained within tolerable limits and benchmarking to be done for this issue to be sufficiently dealt with. ZESA needs to focus on new technologies and systems to reduce the losses. More work is expected in this regard. MOEPD will support such initiatives.

5. Net-Metering

- MOEPD expects net-metering to be radically promoted on a continual basis to stimulate & increase the contribution by consumers to power generation.
- Consideration for virtual net metering must take centre stage. ZETDC was urged to competitively procure smart meters to stimulate uptake and possibly offer the meters for “free” to promote uptake of the scheme.

6. Accidents

- Awareness and safety campaigns need to be increased to reduce accidents, especially on rural areas.
- Electrical accidents involving both members of the public and employees of ZETDC continue unabated due to a plethora of causes, most of which are avoidable.

7. Regulation of Gas Industry

- Increasing knowledge and awareness of safe use of LPG to reduce accidents through engagement of suppliers and consumers to remain on the Authority’s dashboard.
- Abuse of the 48kg gas cylinder has become rampant and needs to be attended to.

8. Service Delivery

- Service delivery remains a major challenge that needs urgent attention.
- Petroleum and Electricity licensees should be urged to develop, publish and operationalize consumer protection standards and complaints handling procedures for the benefit of their customers.
- ZERA should scale up consumer awareness on grading of service stations to ensure that operators in the fuel retail sector raise their standards of safety, quality and convenience.

9. E-Mobility

- The country needs to see an increased uptake in the adoption of EV's through both fiscal and commercial incentives. Hybrid and full electric cars are on the increase on our roads as a number of organisations have heeded Government call for adoption of EV's.
- The MOEPD looks forward to the setting up of EV charging stations to stimulate mass adoption of the technology. Hotels, service stations, airports, universities/schools, hospitals, shopping malls etc. are all encouraged to join in.
- The Central Vehicle Registry is also expected to start working on unique number plates for EV's and hybrids.
- Procurement of e-buses by CMED is at its initial phase.

10. Energy Efficiency and Renewable Energy

- The MOEPD encourages the stakeholders to embrace energy efficient technologies and practices to optimise energy usage.
- More rooftops are expected to be solarised as the solar resource is abundant. Service and product providers are expected to observe standards in this regard.

11. Research and Development

- Local researchers were encouraged to liaise with ZERA on projects that align with ESG and a circular economy for the attainment of a net zero achievement or reduced carbon footprint.
- ZERA expected to consistently accommodate new ideas that will better improve the energy sector such as to improve energy efficiency; enhance safety in using energy products; develop a system to help anti-vandalism.
- ZERA to work with stakeholders in the academic sector and through the Research Council of Zimbabwe, to bring forth the much-needed innovation into this sector.
- ZERA to publicize the availability of funds for R&D in energy in various media platforms.

EXPECTATIONS FROM THE BOARD FOR 2025 STRATEGIC YEAR

The Board Chair outlined the Board's top priority strategic focus for ZERA for 2025 which was to develop a High Performing Organisation. Employees were identified as key partners in achieving this ambition through embracing the Authority's values and transformation of a professional organisational culture hinged on commitment to duty and service to various clients and stakeholders.

The factors for a High Performing Organisation were outlined as follows: -

- a. Management quality.
- b. Employee quality.
- c. Openness and action oriented.
- d. Long term orientation.
- e. Continuous improvement and revival.

In achieving the above, the Authority will broadly define its values into three categories namely, strategic, work and ethics values.

Board Member Expectations

As part of the Board vision for 2025, each Board Committee Chairperson made a presentation on areas requiring strategic focus in 2025.

Audit

- i. Completion of the implementation of SAP.
 - a. The unavailability of SAP continues to be an impediment in bringing operational coordination and efficiency.
 - b. The non-availability of SAP has resulted in a mix of automated and manual systems and this is not working for audit.
 - c. With implementation of SAP, audit efficiency can be achieved.
 - d. The digital world is real, and the Authority cannot afford lagging behind in terms of artificial intelligence.

ii. More skilled Internal Audit Staff Core Regulatory aspects

- a. Span of control getting wider as the authority exercises its mandate
- b. Need for appropriately skilled staff members equipped with the necessary skills to audit all aspects of regulation.
- c. Appropriate training of audit team as approved by the board for the forth coming year.
- d. Exposure of audit team to regional and other authorities in pursuit of best practice.
- e. Timeous provision of gadgets and equipment as approved by the board.

Training and use of Artificial intelligence and identification of cyber security risks and ring fencing against cyber-attacks.

Appropriate Internal Audit Structure

iv. Management and Board Support

v. Sourcing of the Consultant to conduct the External Quality Assurance Review.

Finance and Procurement

- i. Ensure sufficient programmes funding and maintain adequate liquidity to meet financial obligations [manage cashflow, cost containment].
- ii. Diversification of revenue streams: allocation of capital resources to maximize stakeholder value.
- iii. To grow the assets base of the Authority by; - acquisition of office premises and investment properties in regions.
- iv. Enhancement of financial reporting - effectiveness of the current SAP ERP
- v. Procurement of goods and services to best advantage (e-GP)

Enterprise Risk Management

- i. Enhance risk management know how through awareness and training programmes.
- ii. Strengthen implementation of risk controls as well as continuous improvement in line with ESG.
- iii. Alignment of risk management practices into corporate strategy.

Human Resources

	Output		Indicator	Outcome
1.	New structure Implemented.	Align human capital to new structure through recruitment and rationalisation of contracts.	%.	Improved Institutional capacity.
2.	Staff trained and capacitated.	Capacitate employees to meet the mandate in key areas such as gas, renewable energy, compliance, enforcement, audit, risk etc.	Number of employees trained. Conduct a minimum of 2 training courses per individual.	Improved organisational performance.
3.	Culture transformation.	Implement programmes for culture transformation.	number.	Improved service delivery.
4.	Integrity and ethical behavior.	Ensure ethical behavior among employees.	Number. Ethics and Integrity quarterly meetings/workshops.	Reduced corruption tendencies.
5.	Employees engaged.	Address key employees' concerns.	Employee satisfaction index %.	Improved job satisfaction.
6.	Competitive remuneration.	Implement competitive remuneration.	Cost to income ratio within the required statutory levels.	Improved organisation performance.

Electricity

i. Regulatory Compliance			
<i>Outputs</i>	<i>Indicator</i>	<i>Outcomes</i>	<i>Indicator</i>
1.1 Audits and inspections carried out	Number	- Increased compliance to regulatory frameworks. - Improved sector safety. - Improved access/service levels. - Improved sector efficiency. - Cost reflective tariffs.	% increase. % reduction in accidents. % increase in service levels.
1.2 Regulatory initiatives formulated; any of; - Review/new standards/codes/regulations/Acts. - Regulatory reform/market structure/competition. e.g Third Party Access Code, Competitive Procurement, - Licensing, tariffs, and licensee performance e.g Benchmarking.	% completion of target initiatives.		
ii. Renewable Energy			
<i>Outputs</i>	<i>Indicator</i>	<i>Outcomes</i>	<i>Indicator</i>
2.1 Renewable energy products inspections and audits carried out	Number	- Increased compliance to legal framework. - Improved adoption of renewable technologies.	% increase in compliance. % increase in adoption.

2.2 Renewable Energy initiatives formulated: <i>any of</i> ;	% completion of target initiatives.		
• Review/new standards/codes/regulations/Acts • RE Incentives • Other initiatives			
iii. Energy Efficiency			
<i>Outputs</i>	<i>Indicator</i>	<i>Outcomes</i>	<i>Indicator</i>
3.1 Energy efficiency products inspections carried out	Number	• Increased compliance to energy efficiency framework • Increased adoption of energy efficiency products/technologies	• % increased compliance to regulatory framework • % increase in selected indicators of energy efficient technology adoption.
3.2 Energy efficiency initiatives formulated; <i>any of</i> ;	% completion of target initiatives		
• Review/new standards/codes/regulations/Acts • Incentives • Other initiatives			

Electricity Regulation

- i. Review of the tariffs applicable to renewable energy projects – it is necessary to have a current study done in order to align the latest technology costs with applicable tariffs.
- ii. Implementation of the Regulatory Reporting Manuals – the framework is currently being developed by a consultant hired by Ministry of Energy and Power Development.
- iii. Competitive procurement of electricity generation projects – it is expected that the Consultant will finalise the development of the framework in 2024.
- iv. Setting up financial and commercial KPI for the utility.

Technical Petroleum

- i. Upstream/midstream regulation.
- ii. Operationalization of Regulatory levy leading to Energy fund/Development fund, etc.
- iii. Regulatory Accounting framework for sector.
- iv. P and G regulatory capacity building.

EXPECTATIONS OF THE TRIPARTITE IN STRATEGY FORMULATION.

The Authority was advised by the tripartite that in conformity to Government practice all strategic planning documents including performance contracts for senior officials will be integrity checked through a thorough validation process by the tripartite before signing.

The areas to be observed were outlined as follows: -

- *NDS 1 Linkages -targets in the annual plans and performance contracts should link to NDS 1 the country blueprint towards vision 2030.*
- *Targets should demonstrate that the MDA seek to transform the economy and livelihoods of the people in tandem with aspirations of vision 2030 no soft targetting is acceptable.*

- *Some KPIs in the strategic planning documents and performance contracts were not empirically drawn thus compromising the measurement of performance and results.*
- *Differentiation of mandates between the public entity and ministry to avoid duplication; the ministry is policy level with the public entity being the implementer.*
- *Lack of clarity between performance contracts of Hon Minister and Permanent Secretary in your case Board and Chief Executive Officer; the differentiated roles should be clearly spelt in the contracts.*
- *Some Ministers and Secretaries do not fully attend the strategic planning workshops thus affecting buy in and ownership during the implementation process. Their presence is critical to provide the policy and strategic direction.*
- *ICT is a key driver of performance and delivery of results hence need for clear digital strategies. His Excellency, the President has directed that each Ministry have at least two online publications as part of the digital and modernization agenda.*
- *Targets that speak of viability and profitability for commercial entities and this should reflect in the contracts.*

The following amendments were made to the Strategic Plan: -

- The Introduction and Background were reviewed and updated to include the process of the Strategic Plan review as well as indicating that issues raised by MOEPD and Board Members were included in the 2025 Strategies.
- Client Needs/Problem Analysis was re-done to update on ZERA clients and the extent to which ZERA needed to give its attention to the identified needs/problems of the clients. The same was done for Stakeholder Analysis.
- The meeting also considered the Strategies, Assumptions, Risks and Mitigations for the budget year which is 2025. Changes were made which ensured that real strategies rather than actions or routine work were incorporated.
- The section on the Outcome and Outputs Performance Frameworks was reviewed. A thorough review of key performance indicators was done to address challenges encountered in 2024 with wrong descriptions. Some outputs were dropped. This was done for all the 3 programmes.

i) National Level Contribution:

- a. National Vision: “Towards a Prosperous and Empowered Upper Middle-Income Society by 2030”
- b. National Priorities the Agency is contributing to:

	Description of National Priority Area
NPA 1	Transport, Infrastructure & Utilities

- c. National Key Result Areas the Agency is contributing to:

	Description of National Key Result Area
NKRA 1	Provision of improved infrastructure and services

- d. National Outcomes the Agency is contributing to:

	Description of National Outcome
NOUC 1	Improved infrastructure and access to services

ii) Sectoral Level Contribution:**Sector Name:** Energy**a. Sectoral Key Results Areas**

	Description of Sector Key Result Area
SKRA 1	Provision of improved infrastructure and services

b. Sectoral Outcomes

	Description of Sectoral Outcome Description
SOUC 1	Improved Service Delivery
SOUC 2	Improved Energy Supply Capacity
SOUC 3	Improved Access to Modern Energy Services
SOUC 4	Improved Energy Efficiency

1. MDA: Zimbabwe Energy Regulatory Authority (ZERA)

2. MDA Vote Number: N/A

3. MDA Vision Statement:

“Regulator that promotes universal access to sustainable energy by 2030”.

4. MDA Mission Statement:

“ZERA regulates the Zimbabwean energy market, cost effectively, through incentive regulation and in a fair and transparent manner to achieve sustainable energy”.

5. Strategic Values:

VALUES

- **Transparency** - Open, honest and straight forward regulation
- **Responsiveness** - Turnaround times that are aligned to the expectations and needs of stakeholders.
- **Integrity**- Strong ethical and moral principles
- **Team work** - Collaborative effort in achieving common goals
- **Innovation** - Creativity that adds value
- **Accountability** - Reporting and answerable for all ZERA actions and decisions

Acronym: TRITIA

6. Terms of Reference:

ZERA derives its mandate from the following Primary and Secondary Acts: -

- a. Enabling Act:
Energy Regulatory Authority Act, 2011 [Chapter 13:23];
- b. Other Sources of Power (authority)
Electricity Act, 2002 [Chapter 13:19]; and
Petroleum Act, 2006 [Chapter 13:22].

7. Overall Functions:

The functions of the Zimbabwe Energy Regulatory Authority (ZERA) are outlined in the Energy Regulatory Authority Act [Chapter 13:23], Part II, section 4 (1) and these are: -

- a. To regulate the procurement, production, transportation, transmission, distribution, importation, and exportation of energy derived from any energy source;
- b. To create, promote and preserve an efficient energy industry market for the provision of sufficient energy for domestic and industrial use;
- c. To promote the procurement, production, transportation, transmission, and distribution of energy in accordance with public demand and recognised international standards;
- d. To promote coordination and integration in the importation, exportation, and pooling of energy from any energy source in the SADC and COMESA region;
- e. To exercise licensing and regulatory functions in respect of the energy industry;
- f. To ensure that prices charged by licensees are fair to consumers in the light of the need for prices to be sufficient to allow licensees to finance their activities and obtain reasonable earnings for their efficient operation;
- g. To maintain and promote effective competition within the energy industry.
- h. To promote and encourage the expansion of the energy industry and the advancement of technology relating thereto;

- i. To promote, identify and encourage the employment and development of sources of renewable energy;
- j. To represent Zimbabwe internationally in matters relating to the energy industry;
- k. To advise the Minister on all matters relating to the energy industry;
- l. To advise and educate consumers and licensees regarding the efficient use of energy;
- m. To ensure the maximisation of access to energy by consumers that is affordable and environmentally sustainable;
- n. To establish appropriate consumer rights and obligations regarding the provision of energy services;
- o. To establish or approve operating codes for safety, security, reliability, quality standards and any other sector related codes and standards for the energy industry or any sector thereof;
- p. To arbitrate and mediate disputes among and between licensees and consumers;
- q. To assess, promote studies of and advise the Minister and licensees on the environmental impact of energy projects before licensing;
- r. To undertake such other things which it considers is necessary or convenient for the better carrying out of or giving effect to the functions of the Authority.

8. Departments in the MDA and their functions:

The Chief Executive Officer provides overall strategic leadership through the following departments: -

a. CEO's Office

i. Communications Department

- Internal and External Communications Systems
- Brand Image Building
- Corporate Social Responsibility
- Innovation, research and development

ii. Consumer Services Department

- Stakeholder Engagement and Advisory Services

- Consumer Protection
- Innovation, research, and development

iii. **Procurement Management Unit**

- Procurement of goods and services
- Disposal of obsolete assets
- Advisory services
- Statutory compliance
- Supplier relationship management
- Innovation, research, and development

b. Technical Services Department

- Formulation of technical regulatory framework
- Development of new standards within the electricity and petroleum and gas sector
- Monitoring and enforcement of standards within the electricity and petroleum and gas sector
- Involvement in new energy resources development
- Promotion of renewable energy and energy efficiency technologies
- Promoting least cost expansion of the energy sector
- Innovation, research, and development
- Stakeholder advisory services

c. Economic Regulation Department

- Pricing of energy services and products
- Licensing of energy sector operators
- Energy sector compliance enforcement

- Market structure advisory
- Economic research
- Performance monitoring of energy sector operations, GIS management
- Stakeholder engagement and advisory services
- Promotion of investments into energy sector
- Innovation, research and development

d. Corporate and Legal Department

- Secretarial services to the Board
- Corporate Governance
- Legal compliance and enforcement
- Records and Knowledge Management
- Stakeholder Advisory Services
- Innovation, research and development

e. Finance Department

- Financial Management
- Financial resourcing- (Institutional capacitation)
- Facilitate investment, particularly private sector investment.
- Internal Control Systems
- Accounting and Financial reporting
- Statutory Compliance
- Innovation, research and development

f. Corporate Services Department

i. Monitoring and Evaluation Department

- Strategic plan formulation, implementation. monitoring and evaluation
- Monitor and evaluate strategy implementation progress achievement of results and recommending further improvement on strategy implementation.
- Production of weekly, monthly, quarterly and annual strategy implementation progress performance reports.
- Strategy
- Staff IRBM and PBB capacitation.
- Innovation research and development.

ii. Administration

- Policy and Administration
- Innovation, research and development

iii. ICT

- Information Communication Technology (ICT)

iv. Human Resources

- Human Capital Management – (Institutional Capacitation)

j. Internal Audit Department

- Independent and objective assurance on the effectiveness of governance, risk management and internal control processes
- Consulting services to the organisation for continuous development.
- External Audit Liaison
- Innovation, research, and development

k. Risk and compliance

- Risk Management
- Quality Management System (QMS)

9. State Enterprises and Parastatals, Statutory Bodies and Grant Aided Institutions under the MDA and their functions

n/a

10. MDA KRAs

- Governance and Administration
- Energy Regulation
- Stakeholder Engagement & Advisory Services

11. Environmental Scan

In order to understand the Volatile, Uncertainty, Complexity and Ambiguity (VUCA) environment that ZERA is operating in, an environmental scan was conducted. A clear understanding of the external environment guided the Authority in crafting its action plan in a well thought out, strategic manner. A PESTELG (Political, Economic, Social, Technology, Environment, Legal, Governance) and SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis of the organization was carried out to get a clearer picture of the current reality vis-à-vis the Authority's desired future position. Details of this analysis are as follows: -

11a. PESTLEG Analysis

In coming up with the Strategic Plan, ZERA undertook a scan of the political environment, the economic situation, social factors, technological issues, legal, environmental and governance issues. The factors below summarise some of the key factors that impact ZERA's operations: -

ISSUE	DESCRIPTION	IMPACT ON ZERA
POLITICAL	Sanctions	Failure to attract international investors in the energy sector
	Policy inconsistency	• Regulatory uncertainty • Weakens stakeholder confidence in the regulator
	Perceived Country Risk	• Subdued investment commitment • Increased investment costs
	Geo-political conflicts	• Disruptions of energy supply • Price volatility
ECONOMIC	Low disposable incomes	• Reduced revenue • Resistance to cost reflective tariffs and prices. • Skills flight • Lack of/reduced number of local investors
	Sustainable energy pricing	Security of energy supply - Failure to attract investment. - Incapacitation of suppliers of energy services/products
	Inflationary pressures	• Erosion of buying/purchasing power • High procurement costs • Frequent tariff reviews
	High interest rates	• High cost of borrowing • Low energy sector investments
	Differential exchange rate	Market price distortion

ISSUE	DESCRIPTION	IMPACT ON ZERA
SOCIAL	Non-convertibility of currency	• Low investment • Dual pricing
	Increased consumer activism	• Improved enforcement of consumer rights
	Highly informalized economy	• Increased informal activities and compromised safety issues resulting in increased surveillance role of ZERA. • Low access to alternative sources of energy
	Low quality of life	Limited uptake of renewable energy
	Highly educated population	• Improved stakeholder interaction • Competitive labour market
TECHNOLOGY	Inefficient energy use	Absence of energy saving culture
	Pandemics	Low productivity
	Emerging technology	• Deployment and regulation of cleaner energy sources such as green hydrogen, modular nuclear reactors • Failure to keep up with technology. • Challenges in ensuring proper installation, use and maintenance of renewable energy sources
LEGAL	Innovation, research, and development in the energy sector	• Adoption of technological advancement • Skills competencies • Energy transition • Funding • Litigation
	• Legislative gaps • Delays in the promulgation of proposed legislation • Non-deterrent legal penalties	• Poor implementation of mandate • Non-compliance
ENVIRONMENT	Poor waste management	Lack of utilization and recycling of waste resources
	Deforestation	• Pressure to promote cleaner renewable energy sources • Efficient cooking stoves, tree planting

ISSUE	DESCRIPTION	IMPACT ON ZERA
GOVERNANCE	Continued use of fossil fuels	Increased greenhouse gases
	Climate Change	• Requirements for climate change mitigations and adaptation • Carbon credit frameworks and funding
	• Statutory compliance • Autonomy	• Ethical governance • Legitimacy and credibility of regulatory decisions • Timeous decision making

11b. SWOT Analysis

STRENGTHS	WEAKNESSES
• Good corporate image • Established internal business processes and procedures e.g. ISO 9001:2015 Certification • Experienced and knowledgeable staff • Financial Resource availability	• Under-utilization and limited integration of existing information management systems, including SAP. • Limited presence countrywide • Uncompetitive Remuneration framework • • Reduced staff engagement • Poor revenue collection
OPPORTUNITIES	THREATS
• Availability of natural resources such as water, sunlight, gas, wind, coal, biomass, etc • Availability of Green Fund. • Engagement and re-engagement drive with other countries by the government • Collaboration with International & Regional Regulatory Associations • E-mobility- emissions reduction • Infrastructural development in water (Tugwi-Mukosi, Marovanyati, Gwai-Shangani dam) thereby giving opportunities for mini hydro systems. • Government incentives to promote the energy efficiency in industry. • Modern and sustainable energy access preferences • Technological advancements (lithium, uranium) • Midstream petroleum exploration- (Muzarabani, Lupane gas) Technology and training of staff • Central procurement of fuel	• Information asymmetry between ZERA and stakeholders • Withdrawal of funding on fossil fuels eg coal • Vandalism of Infrastructure • Pandemic & natural disasters • Perceived country risk • Increased cyber-crime and cyber-attacks. • Macro-economic instability • Power outages • Drought - low water levels at Kariba • Fuel prices volatility

Situational Analysis

It was agreed that in 2025, ZERA's operating environment may be affected by the following global and regional energy trends and developments: -

- New developments in the exploration of oil and gas in the Muzarabani basin, with exploration wells which were established in 2023. A call was made for an increased capacitation of the Authority in this field while also monitoring further developments on coal bed methane in the western part of the country.
- Continued fall in the global price of renewable energy products, in particular solar pv panels, will see increasing penetration of renewable technologies, necessitating greater oversight on the technologies.
- The discontinued financing of new coal fired power plants by China and the world will present extra challenges to the country's future energy mix and will call for new innovative approaches in capacity planning. Natural gas will play an increasing role in future generation plans.
- The energy supply situation in the country will remain tight, given the deficit within the region and the strong growth in mining, agriculture, and domestic consumption.
- Zimbabwe continues to work towards ensuring that it plays its part in emissions reduction with the latest target being a 40% (*NDC, 2021*) per capita emissions reduction across all sectors of the economy by 2030.

12. MDA Programmes and Outcomes

Prog Ref	Programme Name	Programme Outcome/s	Weight	Responsible Department	Contributing MDAs/ Other Partners	Type of Contribution	Sector Outcome Ref.	National Outcome Ref	SDG Ref
1.	Governance and Administration	Improved Governance and Administration	30%	FAD (Risk Management, ICT, QA, HR and Admin, Finance) M&E, PMU, Legal, Internal Audit	MoEPD, PRAZ, MoFEDIP, SAZ, ZRP, AG, ZIMRA, OPC, OAG, MoPSLSD, NPA	Approval, Advisory, Oversight, Cooperation	1	1	7
2.	Energy Regulation	Increased regulatory compliance. Enhanced cost reflective of energy prices Improved uptake of modern renewable energy and technological innovations Increased energy efficiency	50%	TSD, ERD,	AG, MoEPD, MoECT, MoFEDIP, ZIMRA, RBZ, ZRP, NPA, External lawyers, EMA, RPA, Local Authorities, SAZ, CAAZ, CTC, Min of Industry and Commerce, CCZ, NSSA, Min of Transport, MIAZ, REAZ	Legislative drafting, Policy direction, Border control, verification of imported energy products, Law enforcement, Prosecution, Litigation, Environmental impact assessment, Siting of energy projects, Fire prevention, Approval, Cooperation	2, 3,4	1	7

Prog Ref	Programme Name	Programme Outcome/s	Weight	Responsible Department	Contributing MDAs/ Other Partners	Type of Contribution	Sector Outcome Ref.	National Outcome Ref	SDG Ref
3.	Stakeholder Engagement & Advisory Services	Improved stakeholder satisfaction	20%	Consumer Services, TSD, ERD	CCZ, Residents Associations, MoIC, Media, CPC, (NACORA), CZI, ZNCC, CRAZ, COMZ, REAZ, IPAZ, MIAZ, PROBAZ, Farmer's Unions, MOMC, IPGZ, LPGSAZ, Parliament & Licensees.	Consumer Education & Awareness Publicity Consultation Advisory Resolution of public complaints	1,2,3,4	1	7

13. Legislation and Policies Applicable for the MDA:

External Policy		Prog Ref	Internal Policy	Prog Ref
1.	Vision 2030	1-3	Audit Recommendation Implementation Framework: 2023	1
2.	National Development Strategy 1 (NDS1)	1-3	Brand Manual: 2018	3
3.	MOEPD Strategic Plan (2021-2025)	1-3	Stakeholder Service Charter: 2025	3
4.	National Energy Policy	1-3	Code of Ethics: 2022	1-3
5.	Biofuels Policy	1-3	Corporate Communications Policy: 2024	1,3

14. CLIENT NEEDS/PROBLEMS ANALYSIS

Direct Clients	Needs/Problems	Extent
Licensees a. Electricity ZETDC & ZPC	Needs 1. Sustainable electricity price 2. Autonomous regulator 3. Appropriate codes, regulations and standards 4. Effective and efficient licencing 5. Fairness with dispute resolutions Problems 1. Liquidity challenges (forex and ZWG) 2. Accidents in the industry 3. Vandalism and theft 4. Obsolete infrastructure Causes 1. Non collection of revenue/losses; Currency convertibility 2. Lack of awareness, old infrastructure, skills deficiency 3. Lack of investment into infrastructure maintenance	1. High 2. High 3. High 4. High 5. High 1. High 2. High 3. High 4. High

Direct Clients	Needs/Problems	Extent
IPP/Investors	Needs. 1. Credible off-taker 2. Engagements and transparency 3. Ease of doing business/policy framework 4. Return on investment (ROI) 5. Repatriation of dividends 6. Repayment of loans 7. Institutional Guarantees/De-risking 8. Accurate information and data 9. Standardised PPAs	1. High 2. High 3. High 4. High 5. High 6. High 7. High 8. High 9. High
	Problems 1. No equity from local partners 2. Weak local financial markets 3. Restricted access to foreign currency to pay financing and other obligations. 4. Late payment of invoices by ZETDC in local currency. 5. Off-taker is considered non-credible. 6. Unavailability of IPP policy 7. Perceived country risk/failure to service loans.	1. High 2. High 3. High 4. Moderate 5. High 6. High 7. High
b. LPG Operators	Causes 1. Low domestic savings/ high bank charges and low interest rates 2. Monetary Policy inconsistencies 3. Lack of liquidity of the off-taker and customers paying in local currency 4. Poor debt management by off-taker 5. Inadequate capacity and manpower development 6. Policy inconsistency	
	Needs	

Direct Clients	Needs/Problems	Extent
c. Petroleum (liquid fuels)	1. Availability of forex 2. Piped gas/mobile gas regulations 3. Duty exemption on LPG equipment 4. Efficient licensing 5. Coordination of the establishment of investment in a pool of cylinders by suppliers as a requirement for licensing 6. Good return on investment 7. National LPG storage facility 8. Tax reforms (VAT)	1. Moderate 2. Moderate 3. High 4. High 5. Moderate 6. High 7. High 8. High
	Problems	
	1. Safety and accidents 2. High cost of equipment 3. Restrictive requirement from other licensing bodies 4. Competition from unlicensed dealers 5. Lack of qualified installers	1. Moderate 2. Moderate 3. Moderate 4. High 5. Moderate
	Causes	
	1. Uncoordinated requirements by regulatory bodies 2. Inadequate enforcement framework 3. Absence of higher learning institutions for LPG	
	Needs	
	1. Efficient licensing process 2. Good return on investment 3. Fair dispute resolution 4. Level playing field. 5. Timely and correct information on petroleum sector 6. Light –handed licensing requirements for SMEs (rural and remote areas) 7. Efficient loading ports 8. Transparency and engagement 9. Responsiveness on the part of the regulator	1. Moderate 2. High 3. High 4. High 5. Moderate 6. High 7. High 8. Moderate 9. Moderate

Direct Clients	Needs/Problems	Extent
	10. Ease of doing business e.g. one stop shop licencing and long term licenses Problems 1. Presence of unlicensed dealers 2. Inconsistent blending ratio 3. Over-regulation of the sector (EMA, City Council, Fire, Trade Measures) 4. Low profit margins for dealers/retailers 5. Overtrading (too many sites) Causes 1. Inadequate enforcement measures 2. Lack of implementation of biofuel policy 3. Uncoordinated regulatory bodies	10. High 1. Low 2. Low 3. Moderate 4. Moderate
Government	Needs 1. Professional advice 2. Timely and accurate information 3. Effective delivery of mandate 4. Objective assessment Problems Delays in responses Causes Lack of skilled human capital	1. High 2. High 3. High 4. High High
Consumers Miners Industry Farmers Commerce Domestic	Needs 1. Security/reliability/quality of supply 2. Energy information 3. Safe energy supply 4. Responsiveness	1. Moderate 2. Moderate 3. High 4. High 5. High

Direct Clients	Needs/Problems	Extent
	5. Transparency and engagement 6. Mediation between consumers and licensees 7. Predictable and affordable tariffs 8. Opening of energy distribution industry 9. Import duties and tax rebates for renewable energy and energy efficient equipment. 10. National energy demand master plan 11. Enforcement of energy service providers stakeholder service charter 12. Net metering incentives 13. Promote off-grid development. 14. Promotion of smart meters 15. Consumer education and awareness 16. Local currency fuel 17. Service quality 18. Product quality (equipment, fuel and gas)	6. High 7. Moderate 8. High 9. Moderate 10. Moderate 11. High 12. Low 13. Low 14. High 15. Moderate 16. Moderate 17. Moderate 18. High
	Problems 1. Erratic energy supply 2. Unpredictable fuel prices 3. Poor service delivery 4. Accident and safety issues (public)	1. Moderate 2. Low 3. Moderate 4. Moderate
	Causes 1. Low generation capacity and obsolete power generation plants 2. Macro forces e.g. duties and levies 3. Absence of a list of RE equipment that qualifies for exemptions and unclear duties among regulatory bodies e.g. ZERA and ZIMRA 4. Absence of service charters from energy service providers 5. Lack of awareness campaigns on the part of ZERA 6. Unclear service promises from energy suppliers.	

Direct Clients	Needs/Problems	Extent
	7. Lack of clear framework on import duties on RE equipment 8. Insufficient awareness on net metering	
Employees	Needs 1. Competitive remuneration, rewards, and recognition 2. Remittance of monthly contributions to Unions 3. Honour of relevant Collective Bargaining Agreement/s 4. Fair labour practices for employees 5. Regular Works' Council meetings 6. Training and development 7. Occupational health and safety/wellness 8. Advancement and promotion 9. Adequate tools of trade 10. Availability of funds for operations Problems 1. Lack of timeous review of remuneration frameworks 2. Lack of promotion opportunities Causes 1. Delays to collect levies on time (ZETDC). 2. Inefficient work processes and delays in decision making. 3. Inappropriate organogram	1. High 2. High 3. High 4. High 5. Moderate 6. Moderate 7. High 8. Moderate 9. High 10. High 1. High 2. Moderate

On a weighting scale of 1-3: 1 = Low 2 = Moderate 3 =High

Scale	1	2	3
Rating	Low	Moderate	High

15. STAKEHOLDERS ANALYSIS

Direct Stakeholders	Demands & Expectations	Extent
Government (Central)	1. Effective regulation of the energy sector 2. Advice with respect to all energy issues 3. Growth and sustainable development of the energy sector 4. Statistics and periodic information 5. National Energy Integrated Resource Plan 6. Compliance to statutory requirements 7. Good corporate governance	• High • High • High • High • High • High • High
EMA	Demands Compliance to environmental regulations Expectations Cooperation	• High
ZRP	Demands 1. Clarity of ZERA operations 2. Enforcement of laws 3. Adequate information Expectations 1. Cooperation and support 2. Education and awareness 3. Ethical behaviour	• High • High • High
Local Authorities	Demands 1. Information and expert advice 2. Compliance to by-laws	• High • High

Direct Stakeholders	Demands & Expectations	Extent
	Expectations 1. Cooperation and support 2. Education and awareness	
SAZ	Demands ZERA input into relevant standards formulation Expectations 1. Information 2. Cooperation 3. Enforcement of standards	• High
NPA/Courts	Demands 1. Factual statements for prosecution 2. Adherence to timelines 3. Expert evidence/witnesses in court Expectations 1. Sound legal framework 2. Cooperation 3. Legal representation	• High • High • High
Attorney General	Demands 1. Development of well researched, accurate draft legislation 2. Adequate technical information to inform development of regulations Expectations Cooperation	• High • High

Direct Stakeholders	Demands & Expectations	Extent
Office of Auditor General (OAG)	Demands 1. Timely Draft Financial Statements 2. Compliance to IFRS and PFMA Expectations 1. Cooperation from management and Internal Audit 2. Effective internal control systems 3. Timeous closure of audit observations	• High • High
ZIMRA	Demands 1. Compliance with statutory obligations 2. Exchange of information Expectations 1. Cooperation 2. Regulatory requirements	• High • High
Media	Demands 1. Information 2. Timely responses Expectations 1. Engagement 2. Updates 3. Good corporate citizenship	• High • High
Parliament	Demands 1. Attendance to Parliamentary Portfolio Committees 2. Accurate information 3. Compliance to legislation	• High • High • High

Direct Stakeholders	Demands & Expectations	Extent
	4. Service Delivery 5. Accountability Expectations 1. Exercise of fiduciary roles/duties 2. Engagement 3. Responsiveness 4. Transparency	• High • High
Academic and Research Institutions	Expectations 1. Research funding/support on R&D 2. Priority areas for energy research 3. Guidance 4. Access to information 5. Collaboration 6. Participation	
NSSA	Demands Compliance to NSSA statutes Expectations 1. Good occupational safety and health standards 2. Proper handling of employee retrenchment/retirement benefits in accordance to the Labour Act. 3. Collaboration 4. Updated insurance schedules 5. Engagement of registered suppliers	• High

Direct Stakeholders	Demands & Expectations	Extent
Other Regulatory Bodies & Associations	Demands Compliance Expectations Active participation	• High
Competition and Tariff Commission	Demands 1. Fairness 2. Information 3. Consultation Expectations 1. Cooperation 2. Tariff consultations	• High • High • High
PRAZ	Demands Adherence to procurement statutes Expectations Cooperation	• High
Radiation Protection Authority of Zimbabwe	Demands Compliance with statutes (standards, regulations, directives) Expectations 1. Information 2. Collaboration	• High
ZACC	Demands Compliance	• High

Direct Stakeholders	Demands & Expectations	Extent
	Expectations 1. Cooperation 2. Ethical behaviour and good governance 3. Zero corruption	

16. STRATEGIES, ASSUMPTIONS, RISKS AND MITIGATIONS

Strategies: Game plan to achieve the targets

Assumptions: Positive factors that can assist in the achievement of the targets

Risks: Factors which militate against the achievement of results

Mitigation: Interventions to reduce the gravity or intensity of the damage

Period	Strategies	Assumptions	Risks	Mitigations
Programme 1: Governance and Administration				
Outcome 1: Improved Governance and Administration				
Budget Year - 2025	• Implement the approved structure • Decentralise operations • Enrich Job design • Regular and clear communication to staff • Upscale rewards and recognition • Capacity Building - Retooling and reskilling - Culture change • Enhance performance management • Implement Work- life balance • Develop leadership and management competencies	• Board support • Adequate resources • Competitive remuneration • Skilled and competent human capital • Approval of structure	• Failure to identify correct human capital needs. • Skills flight • Unethical behavior • Low productivity, low innovation and failure to meet objectives • Disengaged employees • Knowledge gap	• Lobbying of a 50:50 staff cost to revenue ratio • Training programme dedicated to ZERA needs. • Competitive conditions of service, • Expansion of revenue base • Strong ethical culture and framework • Comprehensive talent management analysis • Skills development • Contain the regulatory cost
	• Submission of mandatory reports on time	• Quality and accurate reports • Availability of information	• Noncompliance with applicable laws and procedures	• Legal coaching clinics • User upskilling

Period	Strategies	Assumptions	Risks	Mitigations
	- Automate report processes - Adoption of ESG reporting framework	- Functional SAP - Competent employees	- Technological challenges - Weak system of internal controls	Enhance ZERA internal systems
	Effective financial management	- Timely revenue inflows - Expenditure within budget - Stable macro-economic environment	- Unexpected price increases - Exchange rate fluctuation, High interest rates and inflation	- Enforce payment terms and plans - Approved revenue model which responds to positively to changes in market forces. - Cost containment - Annual value for money procurement
	Enhance compliance with the Public Entities Corporate Governance Act (PECOGA) [Chapter 10:21]	Awareness of PECOGA	- Risk of litigation, prosecution, or penalties due to non-compliance. - Unethical behaviour	- Conduct regular internal stakeholders' awareness programs. - Lobbying
	Strengthen Board effectiveness	- Availability of a Board continuous development plan - Availability of an approved Board Calendar. - Adherence to the Board evaluation Framework	- Competing schedules - Delayed submission of Board and committee reports - Lack of Stakeholder confidence. - Information asymmetry - Lack of adequate incentives	- Adherence to Board Calendar - Online meetings - Engagement with management - Automation of business processes

Period	Strategies	Assumptions	Risks	Mitigations
Programme 2: Energy Regulation				
Outcome 2: Increased regulatory compliance				
Budget Year - 2025	• Review Petroleum Act Transportation, construction and storage - Redefine petroleum products - Upstream petroleum and gas activities - Penalty regime enhancement • Review Electricity Act (oversee workmanship and Energy Efficiency activities) • Review of ZWS970 (siting and safety of service station) • Review electricity licencing thresholds	• Capacity to develop legislation, codes, and standards. • Concurrence from Ministry • Responsiveness from AG's office • Responsiveness of stakeholders	• Non-availability of relevant benchmark legislation, codes, and standards • Delays in promulgation of legislation • Lack of cooperation from stakeholders	• Continuous engagement • Stakeholder consultation • Benchmarking
	Enhance security of fuel supply (Buffer stock)	• Oil companies buy-in • Adequate financing	Logistical constraints	Review license conditions
	Increase enforcement - Decentralised operations - Engage more field staff - Streamline internal processes - Secure storage space for exhibits	• Adequate funding • Approval of the structure • ICT functionalities	• Interference by stakeholders • Internal resistance	• Stakeholders' engagement

Period	Strategies	Assumptions	Risks	Mitigations
	Enhance energy access in remote and rural areas.	Adequate funding Alternative energy sources	- Poor viability (fuel) - Reduced grant funding Inappropriate tariffs (mini grids)	- Lobby for subsidies - Light handed regulation. Adopt mini-grid tariff model
	Promote local manufacture of LPG cylinders	Government support	- Lack of fiscal space - Cylinder quality	Cylinder quality framework
	Promote clean cooking-gas.	Buy-in from stakeholders (cultural acceptance)	- Lack of knowledge of technologies - Non- affordability of equipment and clean energy	- Awareness and stakeholder engagement - Enhanced lifeline tariff - Lobby for tax exemption
Programme 2: Energy Regulation				
Outcome 3: Enhanced costs reflective of energy prices				
Budget Year 2025	- Maintain cost-reflectivity of energy prices - Develop multi-year tariff determination framework - Review of petroleum and gas pricing structure	- Availability of internal expertise to carry out the studies. - Adequate inputs/data from operators	Resistance from stakeholders	- Continuous engagement of stakeholders - Development of regulatory reporting manual
	Establish Regulatory accounting framework	Availability of funding	Buy in from stakeholders. Lack of skills to develop framework	- Raise awareness. - Appoint consultant. - Training of licensees and staff
	Recommend: - Centralised fuel procurement framework - Efficient electricity structure-revenue ring fencing	Government support	Resistance from stakeholders	Stakeholder engagement

Programme 2: Energy Regulation				
Outcome 4: Improved uptake of renewable energy and technological innovations				
Budget Year 2025	Review regulatory framework	- Internal capacity to develop legislation, codes and standards. - Support from Ministry and AG's Office	- Non-availability of relevant benchmark legislation, codes and standards - Delays in promulgation of legislation - Lack of cooperation from stakeholders	- Training of staff - Continuous engagement - Stakeholder consultation
	Lobby for RE products incentives: - Solar water heating	Government support	Proliferation of sub-standard products	Stringent quality control measures
	Recommend Energy fund: - Production - Rural, gas access - Biomass - Infrastructure - Biofuels	Government support	- Lack of stakeholder buy-in - Unavailability of funds. - Acceptance of modern energy sources in rural areas	- Engage stakeholders. - Access Green climate funds
	Lobby for competitive procurement of RE technologies	- Timeous completion of the procurement framework - NIERP completed	Interference/Lack of co-operation from stakeholders	Consultation and engagement of stakeholders
Programme 2: Energy Regulation				
Outcome 5: Increased energy efficiency				
Budget Year 2025	Energy efficiency Training	- Stakeholders buy-in - Availability of training materials - Localised skills	Expensive intervention measures	Explore climate finance opportunities.
	Lobby for Energy Management	Promulgation of regulations	- Inexperienced ESCOs - Resistance by stakeholders	Stakeholder engagement

	Regulations and Minimum Energy Performance Standards for Appliances		Increased cost of appliances	- Training of Energy Efficiency professionals. - Establish funding mechanism - incentives
	Promoting efficient mobility: - CNG - Green Hydrogen - EV mobility	- Mature technologies and availability of expertise - Government support	Stakeholder resistance	Stakeholder awareness and training
	- Promotion of waste to energy projects - Fund feasibility studies - Promotion of gas for cooking	Local Authorities support	Stakeholder resistance	Stakeholder awareness and training
Program 3: Stakeholder engagement & Advisory services				
Outcome 6: Improved stakeholder satisfaction				
Period	Strategies	Assumptions	Risks	Mitigations
Budget Year 2025	Influence stakeholders' perception of ZERA	- Availability of resources - Decentralisation - Knowledge of ZERA - Stakeholders buy-in	- Non-responsiveness and participation - Ineffective messages	- Campaigns - - Engagement of local leadership/community structures - Engage in local language to enhance understanding - Present ZERA in a stakeholder centric manner
	Introduce punitive measures to non-compliant licensees	- Cooperation from parties to the dispute - Availability of enabling frameworks (SOPs, from ZERA and Licensees)	- Unresolved disputes - Lack of evidence - Tarnishing of Institutional reputation	- Review/Implement Regulations with Legal Recourse for Resolution. (compensation guidelines for licensees) - Awareness on Complaints reporting

				• Encourage customer loyalty to service providers • Sensitise consumers on Consumer Protection Act and align Consumer frameworks to ACT
	Enhance communication and positive media coverage of ZERA's regulatory role and energy matters	Readiness of media to engage	• Failure to communicate effectively. • Bad Media Publicity of ZERA and its activities • Limited access to media channels (newspaper, radio, tv, social media) • Stakeholder's lack of interest	• Develop inclusive informational educational communication material (IEC) • Adoption of Digital Media Strategies for enhancement of communication • Sustained media engagement • Keep media informed • To increase local presence • Make energy issues relevant and interesting (RE, Energy Saving, Safety)
	Uphold Corporate Citizenship	• Availability of resources to undertake CSR activities • Board and Management Support • Clarity on ZERA's mandate	• Lack of impact of CSR activities • Loss/distortion of message/ strategic thrust/intention • Entitlement syndrome by virtue of ZERA being a public entity	• Strategic identification of projects • Clearly "brand" ZERA • Clarity in messaging

SECTION B: PERFORMANCE FRAMEWORK FOR THE MDA

17. Programme Performance Framework

17a. Outcome Performance Framework
